

Power in safe hands.

Pero washing system  
– fast and clean

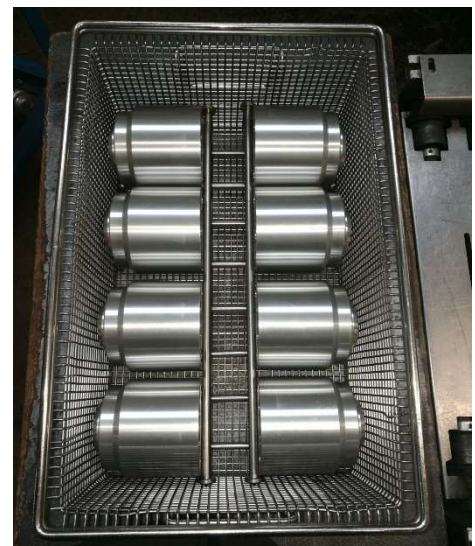

## The Pero full-vacuum cleaning system

### Technical description:

- Suitable for products measuring up to **520 x 310 x 180 mm**
- Turned and milled parts
- Punched, drawn and extruded parts
- Suitable for cleaning the following materials: aluminium/aluminium alloys, copper/copper alloys, brass, bronze, galvanised steel, stainless steel, plastics (PE, PA, polyester)
- Maximum weight: 50 kg

### Benefits:

- Parts are dry after cleaning
- Short cycles (average cleaning time for 50 kg of steel = around 8 min.)
- Highly flexible, allowing several cleaning processes to be combined
- All cleaning and distillation processes can be carried out at low temperatures (max. 100°C) – protects parts

Movement of components during cleaning	Cleaning process	Cooling lubricants
Swivelling	Full immersion	Zubora 30 Extra / H EP
Rotation up to 360°	Full flush/rinse	Zubora 65 H Ultra
Rotating at intervals	Vapour degreasing	Bonderite L-MR 71-2
Tilted position	Ultrasonic cleaning	Blasocut BC 25 MD
	Drying	Hysol T 15
		CORTEC VpCI 377
		HOCUT 795
